

# MADEIRA 2007

14<sup>th</sup> February 2007 – Levada Do Caldeirão Verde

**Description**

**PR 9**

Distance: 4.5 km (+ 4.5 km regresso)  
 Time: 5h30 m  
 Maxim altitude: 980 m  
 Minim altitude: 890m  
 Start: Parque Forestal das Queimadas  
 End: Parque Forestal das Queimadas

This trail begins at the Queimadas Foresty Park and winds along the walkway of the levada of Caldeirão Verde at 980 m elevation, in the municipality of Santana.

The levada of Caldeirão Verde is an impressive work of art built in the 18<sup>th</sup> century that begins in the main stream bed of the Caldeirão Verde brook. Passing through steep cliffs and mountains, it carries the water that runs off the highest mountains of Madeira, to be used to irrigate the farm lands of the parish of Fajal.

At the Queimadas Foresty Park there is a shelter (Casa de Abrigo das Queimadas), which retains the original features of the typical houses of Santana, including a marvelous thatched roof.

After you pass through the 4 tunnels on the route, Caldeirão Verde appears on the left of the levada and one has only to climb a few metres along the stream bed to reach it.

The Caldeirão Verde lake is formed by water that falls from the bed of the Caldeirão Verde stream bed from a height of approximately 100m.

**Warnings:** Tunnels en route, carry a torch; the path may be slippery, wear anti-slip footwear.
